Career Summary

Frontend Engineer with 3+ years of experience building responsive, high-performance web applications using React.js, Next.js, TypeScript, and JavaScript. Skilled at translating designs into clean, reusable UI components, integrating REST APIs, and shipping complete features alongside backend teams — including a QR-based payment application that gave hands-on exposure to fintech-style transaction flows. Comfortable working in fast-paced, cross-functional teams from architecture through deployment.

Technical Skills

Languages

JavaScript (ES6+) TypeScript HTML5 CSS3

Frameworks & Libraries

React.js Next.js Tailwind CSS SASS Zustand
React Hook Form Zod

Backend, APIs & Database

Node.js Express.js REST APIs MongoDB

Mobile

Expo React Native

Tools & Workflow

Git, GitHub, Vite, Visual Studio Code, Figma

Core Skills

- Component-Based Development
- API Integration
- Responsive UI Development
- Frontend Performance Optimization
- Version Control
- Debugging

Education

Lead City University

Ibadan, Nigeria
B.Sc. Computer Science
2021 - 2025

TechVerse Academy

Ibadan, Nigeria
Frontend Development Program
March 2024 - August 2024

Honors & Achievements

- Top 10 Winner, HackOps 1.0 Hackathon — 2024
- Youth Empowerment Initiative — 2024
- General Secretary, NACOS — Lead City University Chapter

Languages

English, Yoruba

Key Projects

Chiquitas IMS — Inventory Management System

React.js | TypeScript | Tailwind CSS | Vite | Node.js

- Developed an inventory management application for a hair and wig business, automating inventory tracking, order processing, and customer management.
- Replaced manual processes with a centralized digital solution, reducing errors and supporting business growth.

Health Guardian — Hospital Management System

Next.js | TypeScript | Tailwind CSS | Node.js

- Built a responsive hospital management application with interfaces for healthcare and administrative workflows.
- Applied component-based development principles to keep the codebase maintainable and reusable.

QR-Pay — Payment Application

React.js | Tailwind CSS | Node.js | MongoDB

- Built a payment application with QR-based functionality for retrieving payment and account information.
- Integrated frontend with backend APIs for transaction-related features, focused on reliability and a simple, user-friendly transaction experience.

E-Book Library

React.js | Open Library API

- Designed an interactive interface integrating the Open Library API for access to 20M+ books, boosting user engagement by 30% and satisfaction by 40%.
- Implemented real-time search and filtering to improve book discovery and retention.

Professional Experience

Frontend / Software Developer — IT Department

2026 - Present

Onasis Links Resources Limited · Lagos, Nigeria

- Develop responsive web interfaces and business applications using React.js, JavaScript, Tailwind CSS, and modern frontend workflows.
- Build an internal operations dashboard to improve task management, staff coordination, reporting, and customer follow-up.
- Integrate frontend applications with REST APIs for authentication, notifications, and business workflows.
- Develop reusable UI components — tables, forms, dashboards, status indicators — including notification read/read-all functionality.
- Collaborate with backend developers to connect interfaces to real application data.

Frontend Developer

2024 - Present

QTech Innovations (formerly The4Coders)

- Collaborate with a development team to turn manual business processes into functional software, including inventory and hospital management systems.
- Built GloroQ, a Next.js esports/gaming tournament platform, including a multi-step tournament creation wizard, game-category and tournament hub pages, and a communities feature set (channels, tickets, two-way chat with polling).
- Implemented token-based auth on GloroQ with Zustand, Zod, and React Hook Form, plus Next.js middleware reading auth state from cookies and a Bearer-token API layer with 401-retry logic.
- Developed a university Biometric Attendance System spanning a React/Vite/TypeScript admin dashboard and an Expo/React Native student app, wiring the lecturer dashboard to a live Node.js/Express/MongoDB backend.
- Built responsive, accessible interfaces with a consistent user experience, debugging and improving functionality alongside other developers.
